

Malnutrition remains a silent crisis in the Philippines. Every day, thousands of children arrive at school undernourished—many stunted or wasted—putting their physical and mental development, and ultimately their future, at serious risk.

**Feeding
Futures^{PH}**
Give Meals, Grow Minds

What We Do

Feeding Futures PH provides daily, nutritious meals to **malnourished and stunted** children in impoverished communities throughout the school year. We partner directly with public schools to identify the most vulnerable students and ensure they are consistently supported.

Daily Hot Meals — Each meal includes rice, viand, vegetables, and fruit, thoughtfully prepared by trusted food commissaries to ensure both quality and nutritional value.

Health Monitoring — Each child's Body Mass Index (BMI) is regularly assessed, with sustained support provided until optimal and stable health levels are achieved.

Academic Follow-Through — In partnership with schools, we help keep children enrolled and engaged in formal education. Studies show that consistent access to education can increase a child's lifetime earnings by up to 25% and significantly reduce the risk of generational poverty.

Scalable, Efficient, and Sustainable — Our program runs at just ₱65 per meal (₱50 for food, ₱15 for delivery), made possible through partnerships and volunteers—designed to grow seamlessly with the right support.

How You Can Help

We are inviting **corporate partners, retailers, banks, and restaurants** to make it easy for customers to contribute through everyday transactions.

Retailers, Banks, etc.: We can provide posters or standees to be placed near checkout lanes. You may also support this initiative by training personnel to assist customers who wish to make a donation—whether directly at the counter or via digital wallets—ensuring the process is quick, seamless, and impactful.

Restaurants: We can include donation flyers alongside customer bills, providing a simple yet effective way to invite customers to contribute and engage with the initiative.

Our first partnership is with PBCOM, and many more are expressing interest. With your support, we can bring more children into the program and give them the nourishment they need to thrive.

Be Part of the Solution

Partner with Feeding Futures PH and help nourish a generation—one meal, one child, one future at a time.
